Objective

"A Standard Operating Procedure is a document which describes the regularly recurring operations relevant to the quality of the investigation".

Standard Operating Procedures are an essential part of a quality system. The objective of a SOP is to carry out the operations correctly and always in the same manner. A SOP should be available at the place where the work is done".

The Objective of this SOP is to provide guide on how to use **screen recording tab** in the Pcvisor portal.

Introduction

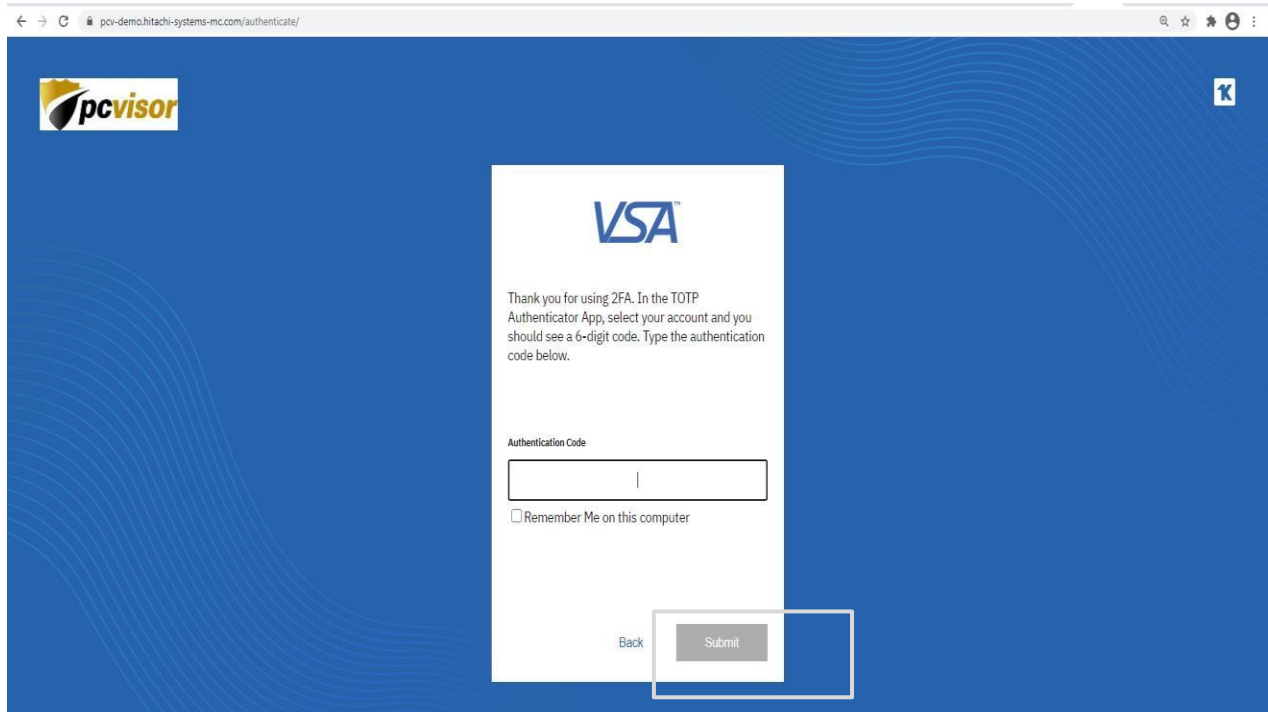

The screen recording tab lists all the session recordings. User can simply click on the machine id to see the recordings done on that machines. Also, one can view the size of the file in MB and the recordings are automatically removed, based on the **Length of time to keep logs** setting on this page

How to reach Logoff button in Agent tab

Step 1: Enter credentials in the login page of Pcvisor portal. Click on the Log in button.

The screenshot shows a web browser window with the address bar displaying "pci-demo.hitachi-systems-mc.com/vsapres/web20/core/login.aspx". The page features a blue background with a white login form. The form contains the VSA logo at the top, followed by input fields for "Username", "Password", and "Domain". Below these fields is a checkbox labeled "Remember me on this computer" and a link for "Forgot Password?". A blue "Login" button is positioned at the bottom right of the form, and it is highlighted by a white rectangular box.

Step 2: Enter the authentication code and click on the submit button.

pcvisor

VSA

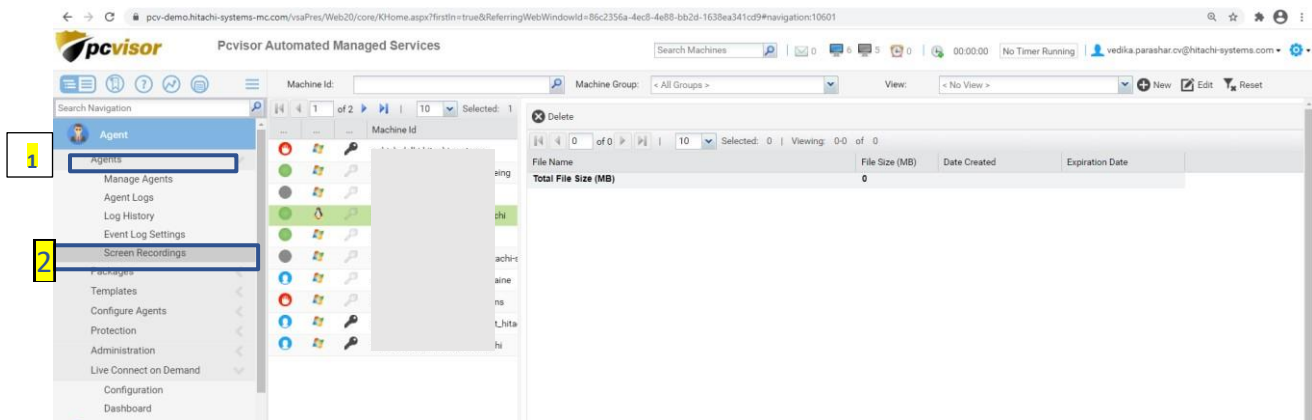

Thank you for using 2FA. In the TOTP Authenticator App, select your account and you should see a 6-digit code. Type the authentication code below.

Authentication Code

☐ Remember Me on this computer

[Back](#) [Submit](#)

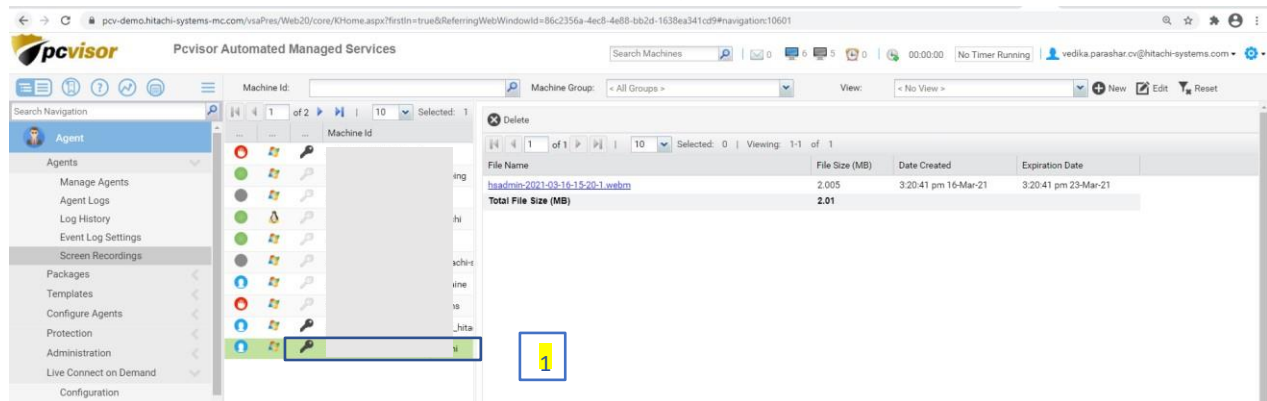

Step 3: Once you are logged in, click on the **Agent** module under that there is a sub module called **Screen Recordings**.

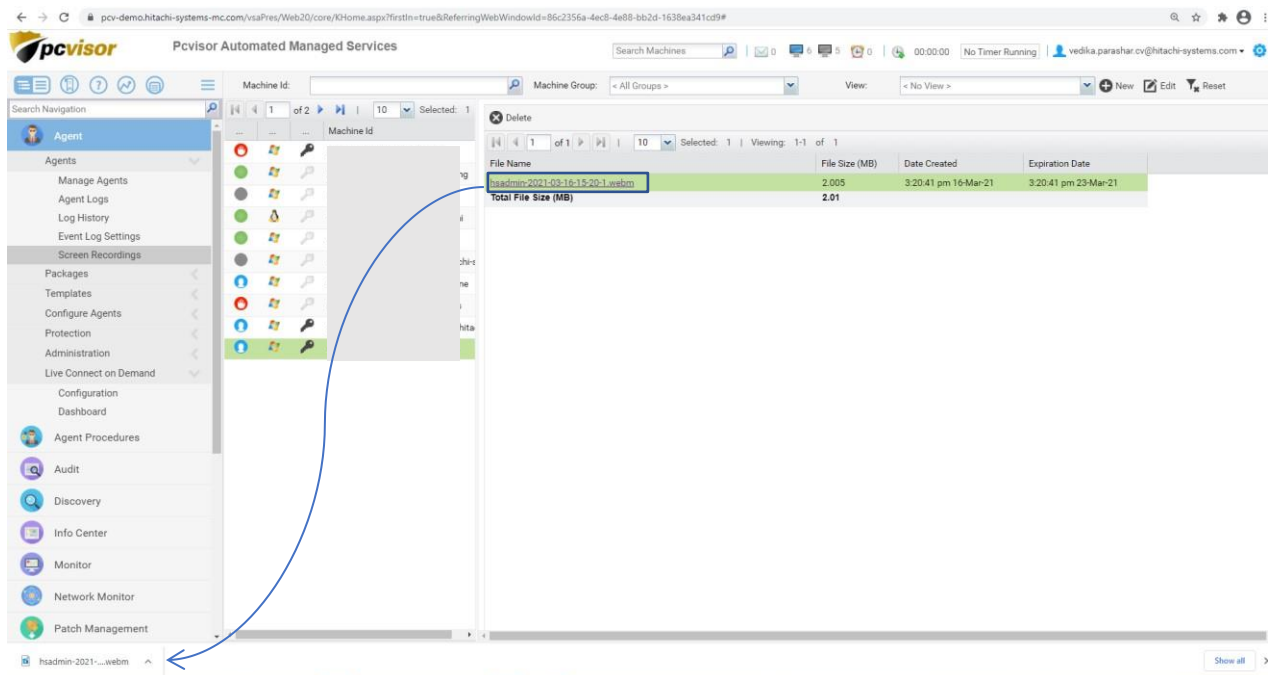

How it works

Steps to follow:

Step 1: Once you reach the Screen Recording tab, click on the Machine id.

Step 2: simply click on the file name , a file will be downloaded with .webm.crdownload extension.

Step 3: By clicking on the downloaded file either from browser or by file explorer, user will be able to view session recordings.

Standard Operating Procedure

The screenshot displays the Pcvisor Automated Managed Services web interface. The top navigation bar includes the Pcvisor logo and the text "Pcvisor Automated Managed Services". Below this, there's a search bar and several status indicators. The left sidebar contains a "Search Navigation" section with a list of menu items: Agents, Manage Agents, Agent Logs, Log History, Event Log Settings, Screen Recordings, Packages, Templates, Configure Agents, Protection, Administration, Live Connect on Demand, Agent Procedures, Audit, Discovery, Info Center, Monitor, Network Monitor, Patch Management, and Policy Management. The main content area shows a table of managed machines. The table has columns for Machine Id, Current User, Last Reboot Time, Last Checkin Time, OS Version, IP Address, and Agent Version. The table contains 11 rows of data, showing various machines with their respective details. A notification bubble in the bottom right corner says "Edit and view your videos in the Photos app".
